WORK EXPERIENCE

NIQ Solutions Ltd | January 2021-December 2021

User Experience Researcher / Frontend intern

- Collaborated with designers to create engaging user experiences, that helped improve the company's product design. Using HTML, CSS and Javascript.
- Conducted user research for about 70 prospective users for a food delivery app.
- Analyzing data: Analyzing the data collected from user research to identify patterns and insights that inform the design of a product or service.
- Worked on improving the interface of a hair vending app, and advising clients on what to do.
- played a key role in decision making, by providing valuable insights and recommendation based on research findings.

Projects

Calculator Application:

A simple calculator web app, created with React.js with a simple and intuitive user interface, making it easy for anyone to perform basic arithmetic calculations. The app is both fast and responsive, providing users with a seamless experience. Created with HTML, CSS 3 and React.js

To-do list web application:

A simple to-do app created with Vue 3, which consist of an input form, to add new task. List to display existing task, Checkbox to mark completed task and lastly a button to add and delete task. Created with HTML, CSS 3 and Vue 3.

Counter Application:

A counter composable web app with increment, decrement, reset, set Value functions with a valid UI.

Page navigation, was handled with Vue router, and also a router that redirect a 404 page not found When a user clicks an invalid link. The app is responsive thereby providing a seamless user experience with intuitive design.
